Table IA: Approved Specialty Certificates by ABMS Member Board

A specialty certificate is first awarded by an ABMS Member Board to candidates who meet the requirements for certification in a specified field of medical practice. This table lists the specialty certificates currently approved for issue by the boards. Footnotes can be found on pages 5 and 6. Visit abms.org for the most current list of certificates offered by the ABMS Member Boards and descriptions of each specialty.

Table IB: Approved Subspecialty Certificates by ABMS Member Board

A subspecialty certificate is awarded by one or more ABMS Member Boards in a component of a specialty. It can be granted only to specialists who have been certified by one or more board(s) in an area of specialty certification. This table lists the subspecialty certificates currently approved for issue by the boards. Footnotes can be found on pages 5 and 6. Visit abms.org for the most current list of certificates offered by the ABMS Member Boards.

* ABMS board certification includes continuous assessment and learning activities that help physicians evaluate and refine their knowledge, judgment, skills, and service to patients. Since the program requires ongoing professional activity, particular requirements must be completed before a physician receives an updated certificate.

† Certificate issued prior to 1972 when ABMS subspecialty recognition procedures were established.

†† Certificates not yet issued.

(1) First year certificate issued by the Member Board.

(2) Founding member of ABMS.

(3) In 2018, the American Board of Genetics and Genomics merged two of its certificates, *Clinical Cytogenetics and Genomics*, and *Clinical Molecular Genetics and Genomics* into *Laboratory Genetics and Genomics*. After July 2017 no new trainees may begin training solely in either of the individual areas.

(4) American Board of Medical Genetics and Genomics certificates established prior to becoming an ABMS Member Board.

(5) In 2018, the ABMS Board of Directors approved a name change for the American Board of Otolaryngology to the American Board of Otolaryngology - Head and Neck Surgery.

(6) The following certificates were issued only during years indicated below.

American Board of	Certificate Name	Years Issued

(8) Effective July 1, 2006, the American Board of Surgery re-designated its certificate in Vascular Surgery from that of subcertification to one of specialty certification. The certificates of surgeons certifying in Vascular Surgery by this new pathway are identical to those previously issued for successful certification/recertification in Vascular Surgery.

(9) For physicians certified by the American Board of Family Medicine entering the board's continuing certification (MOC) program in 2012 or later, and for physicians initially certified by the American Board of Internal Medicine, the American Board of Medical Genetics and Genomics, the American Board of Pathology, the American Board of Pediatrics, the American Board of Psychiatry and Neurology, or the American Board of Radiology, maintaining certification is contingent upon their meeting the requirements for the specific board's MOC program, and therefore no certification end date is provided. To maintain certification from their specialty board, physicians must successfully complete specialty-specific requirements throughout their ongoing MOC cycles.

Table 2: ABMS Member Board Requirements for Initial Certification in a Specialty

Specialty certification is first awarded to candidates who meet the requirements in a specified field of medical practice. This table identifies the requirements by Member Board for initial certification in a specialty. Contact the particular board to confirm all requirements. Footnotes can be found on page 9.

(1) Prerequisite Requirement is defined as graduate medical education that precedes training in the residency program for a specialty. Specialty Requirement is defined as the time spent in the residency program for the specialty. All training must be accredited by the Accreditation Council for Graduate Medical Education (ACGME), the accrediting body for post-MD or post-DO medical training programs in the United States.

(2) The ABMS Board Eligibility policy, effective January 1, 2012, limits the period of time that may elapse between a specialist's completion of training and achievement of initial certification in a specialty. The Member Boards established transition dates for physician candidates who had completed training, but not yet achieved initial certification in a specialty as of the ABMS Board Eligibility Policy's effective date. This period can be three to seven years following the successful completion of accredited training, plus time (if any) in practice as required by the board for admissibility to the certifying examination. Member Boards marked with an asterisk (*) either had board eligibility policies in place prior to the effective date of the ABMS Policy or their transition dates have passed. Their board eligible periods aligned with the principles of the ABMS Policy.

(3) Colon and Rectal Surgery requires candidates to pass the traditional examination given by the American Board of Surgery. Candidates have 7 years to complete both the traditional and oral examinations after application approval.

(4) Neurological Surgery candidates who complete residency training on or after June 30, 2011 but before June 30, 2017 must submit a completed application no later than four years following the completion of residency training. Candidates who complete training on or after June 30, 2017 must submit a completed application no later than three years following the completion of residency training. Candidates have three attempts to pass either the written qualifying exam or the oral certification exam.

(5) Orthopaedic Surgery candidates have five years to achieve certification after passing the traditional examination.

(6) Thoracic Surgery will accept a Vascular Surgery residency in lieu of a General Surgery residency as long as the Vascular Surgery training leads to primary certification by the American Board of Surgery.

Table 3: ABMS Member Board Requirements for Continuing Certification (MOC)

This table identifies the requirements by Member Board for maintaining certification in a specialty. The process includes assessment and learning activities that help specialists evaluate and enhance their clinical judgment, procedural skills, and service to patients. Evidence of ongoing professional activity, outlined briefly below, is required. The Member Boards consider specialists' performance on all requirements to determine whether they are continuing to meet the standards for certification. Requirements may differ for a subspecialty certificate. Contact the particular board for the most current information. Footnotes can be found on page 12.

Urology (ABU)	Peer review, professional references	CME credits, online practice assessment			Knowledge assessment customized to practice with feedback regarding concept area performance with CME assigned for areas of substandard performance	Practice Assessment Protocol (PAP), case log review, attestation with audit, peer review, professional responsibility action review, and surgical complication narrative reviews, registry participation	Yes

(*) Current and unrestricted medical license must be maintained in the jurisdiction(s) where a specialist chooses to practice. Other requirements listed by board.

(**) Continuing Medical Education, or CME, consists of educational activities to assess, develop, and increase specialists' knowledge, judgment, skills, and professional performance. CME activities are certified and credit is awarded from one or more of the following credit systems: AMA PRA Category 1; AAFP Prescribed Credit, ACOG Cognates: AOA Category 1A.

(1) Requirements could include practice-relevant CME such as literature reviews, conference participation, online assessment, and/or particular board- or society-developed self-assessment modules.

(2) Many ABMS Member Boards are exploring, piloting, or have launched programs involving longitudinal assessment to support professional development. The longitudinal approach involves administering shorter assessments of specific content repeatedly over a period of time. In this way, concepts and information are reinforced and accumulated gradually. Gaps in knowledge can be addressed by reviewing educational materials or continuing medical education activities such as those available through the ABMS Continuing Certification Directory, improving practice performance projects such as those available through the ABMS Portfolio Program or other professional development activities.

(3) Journal article based assessment involves review of a collection of articles with which physicians should be familiar and demonstrate mastery of the information by responding to questions related to the articles.

(4) The ABMS Portfolio Program offers an option for organizations to support physician involvement in quality, performance, and process improvement (QI/PI) initiatives at their institution and award physicians Improvement in Medical Practice credit for MOC.

Table 4: Specialty Certificates Issued by ABMS Member Boards 2008-2017

Examination of this table will show the comparative degree of activity in specialty certification and the change with time among specialties. The counts also can include certificates which are no longer issued or have been inactive during this time period. "A" indicates the year the certificate was approved by ABMS. See Table IA for certificate issue date information.

(*) Two or more ABMS Member Boards may offer similar subspecialty certificates using the same or similar title and equivalent standards. See Certificates offered by Multiple Boards table for examination administering board information.

(1) Certificate counts listed prior to Member Board certificate sponsorship were transferred from another Member Board.

(2) Beginning in 2008, the American Board of Pathology changed the names of these certificates. Totals include certificates issued under the former and new names. See Table 1B footnotes for additional information.

(3) In 2006, the American Board of Surgery designated Vascular Surgery as a primary pathway certificate. Totals for the number of surgeons certified in this area can be found in Table 4.

Table 6: ABMS Board Certified Physicians by Member Board and State

Numbers in this table provide a count of ABMS Member Board certified physicians with an active specialty or subspecialty certificate by location recorded in the ABMS database as of June 30, 2018. Physicians may hold certification in more than one specialty or subspecialty and may be certified by more than one Member Board. The numbers are distinct counts. A physician is counted once per Member Board and once in the grand total. These numbers include certificate holders who are retired and excludes physicians who are deceased.
